

ABDULRAHMAN FEKRY

FLUTTER DEVELOPER

profile

A detail-oriented and passionate Flutter Developer with hands-on experience in designing, developing, and deploying cross-platform mobile applications. Skilled in building user-friendly and visually appealing interfaces, integrating APIs, and implementing effective state management solutions.

Education

BA in Information Systems , Faculty of Computers & Artificial Intelligence , Benha University

May 2018 – July 2022

Technical Skills

- Programming & Language: Dart, OOP, Clean Code
- Flutter Framework: Flutter, Animations, Responsive UI
- State Management: BLoC, Cubit
- Architecture & Patterns: MVVM, SOLID Principles, Dependency Injection
- Data & Storage: Firebase, Shared Preferences, SQLite
- API & Networking: REST APIs, Dio
- Tools & DevOps: Git (GitHub), Postman, Android Studio
- Soft Skills: Teamwork, Communication, Problem Solving, Adaptability
- Others: Google Maps, Localization, Local Notifications, Payment Gateway Integration

projects

- DocWay – Doctor Appointment Booking App

[GitHub](#) | Flutter, Bloc, REST API

- Developed user authentication (login/signup) with secure token handling using Flutter and Bloc.
- Integrated RESTful API to fetch and filter doctors dynamically.
- Implemented state management using Bloc for efficient UI updates.
- Features include searching, filtering doctors by specialty, and booking appointments.

- Specific Education – Faculty Mobile App

[GitHub](#) | Flutter, Firebase Auth, Firestore, Sqflite

- Developed a Flutter-based mobile application for the Faculty of Specific Education.
- Implemented secure user authentication using Firebase Authentication.
- Integrated Firestore for real-time storage and retrieval of user data.
- Used Sqflite for local offline data storage, ensuring the app works without internet access.

- Shop Sphere – E-commerce Mobile App

[GitHub](#) | Flutter, Dart, Cubit (Bloc), REST API, Paymob.

- Developed a Flutter-based e-commerce app offering a smooth and intuitive online shopping experience.
- Integrated Paymob for secure and reliable online payment processing.
- Used RESTful APIs to implement core features such as:
Product browsing , Cart management , Checkout process
- Applied Cubit (from Bloc library) for structured and efficient state management across the app.

- News App – Real-Time News Application

[GitHub](#) | Flutter, Dart, Cubit (Bloc), News API

- Developed a mobile application using Flutter to deliver real-time news updates to users.
- Integrated a News API to fetch and display articles from trusted sources.
- Utilized Cubit (from the Bloc library) for efficient state management and smooth UI updates.
